GALILEO Performance Explorer®

Galileo for Health Assessments

Did you know that over 70% of organizations have correctable performance problems?

Even the best-run data centers require periodic health checks. Health checks provide the integral data necessary to maintain a unique IT infrastructure. Businesses can achieve peace of mind from learning that infrastructure is performing optimally or current and future problem areas can be proactively identified and resolved.

A Critical Check-Up

Galileo Performance Explorer makes health assessments quick and easy by providing insight to significantly improve infrastructure high availability, performance and reducing operational cost. The operational intelligence that Galileo offers out-of-the-box ensures that organizations have the knowledge to leverage maximum performance and efficiency for their IT infrastructure.

With Galileo, organizations can look at their overall operation and identify current or potential problem areas by analyzing the parts that make up the whole: servers, storage, database, SAN and cloud assets. Detailed graphical dashboards display an environment's strengths and weaknesses and identifies realistic opportunities for improvement.

Utilizing Galileo for regular health assessments provide the valuable insight necessary to:

- · Right size your environment
- · Evaluate readiness to
   deploy advanced applications
- · Identify performance bottlenecks
- · Maximize resources
- · Roadmap future improvements
- · Reduce capital expenses

Galileo's Complimentary Midpoint Health Assessment

Galileo's free 30-day proof of concept includes a complimentary **Midpoint Health Assessment.** After agent installation is complete, our senior technology experts will provide a live report with a detailed breakdown of all key systems which can be used for future maintenance, installations, optimizations and upgrades. Included in the live assessment:

- · **Solution Overview**
- · **Current Environment**
   (Enterprise Dashboard)
- · **Incidents (Analytics Dashboard)**
- · **Performance (Core Dashboard)**
- · **Summary of Findings & Considerations for Next Steps**

You'll see the value in Galileo with a guided presentation from our SMEs covering your infrastructure insights and predictive analytics, as well as advice for the future planning.

By having full visibility into the health of your IT infrastructure, your organization can enjoy the comfort in knowing both that you are performing at peak and that you have the critical data required to avoid future problems. **Galileo Performance Explorer** is here to ensure that you have the knowledge and support you need to ensure infrastructure is performing optimally.
